

Benefits of using Tatva-Bio-Power

1. Improve soil physical condition by making it more porous as well as increase its softness
2. Improve soil water holding capacity
3. Due to enrich with beneficial microbes its directly effect plant growth by increasing beneficial soil bio-mass
4. Due to enrich with humic and sea extract it again rises microbial activity in the benefit of crop
5. Tatva-Bio-Power help to reduce salt formation in soil so balance pH level
6. Tatva-Bio-Power enrich with *Azotobactor* as well as Phosphorus solubilizing microbes so use full to provide both primary nutrient to crop
7. Tatva-Bio-Power enrich with *Trichoderma viride* as well as *Paecilomyces lilacinus* which reduce population of harmful diseases causing microbes and nematode
8. Help plant to develop feeder root
9. Over all improve soil physical, chemical as well as biological property
10. Add humas material in soil
11. Increases soil fertility as well as productivity
12. Reduce soil erosion
13. Reduce water litching
14. As Tatva-Bio-Power is free of any weed seed, it reduce chances of weed plant establishment in field which is very much common during using of ordinary encompass FYM (dung).

Analysis report of Tatva-Bio-Power in government approved lab

- Moisture % by weight	: 22.49 %
- Color	: Black
- Order	: Absent
- Total Organic Carbon	: 35.5 %
- Total Nitrogen	: 1.2 %
- Total Phosphorus	: 1.5 %
- Total Potash	: 1.2 %
- C:N Ratio	: 13.75 – 1
- pH	: 6.8

Dose- 5-10 kg / acre

Direction for use:

Broad casting:

Take material from Tatva bag and broad cast it near plant stem at soil level. After application give water so that Microbes as well humic and seaweed substances can reach up to soil rhizosphere

Packing available

Powder form- 50 kg bag

PACBIOFUNGEBACT
